Hard working Software Engineer with a passion for solving challenging problems with clean code. I love to learn and I am seeking opportunities for continuous growth as a professional and person.

Professional

CoverMyMeds, LLC   Columbus, OH (Remote)
Software Engineer   June 2021 - Present

- Adapt quickly in an ever-changing environment, for example, over the last 2 years I have worked in 5 separate workspaces within my business unit
- Implement features within a Ruby app and currently onboarding onto an Elixir app
- Lead team meetings consistently, such as Retro
- Active in the organizational initiatives, such as hiring and documentation
- Quick to respond to organizational red alerts

Nationwide Mutual Insurance Co.   Columbus, OH
Sr. Developer, IT Applications   December 2020 - May 2021

- Lead Edge API development in Policy Center for Servicing
- Acted as trusted resource for internal consumers of the API to ensure smooth onboarding
- Analyzed and fix defects swiftly to ensure a positive experience for all end users
- Maintained accurate OAS documentation as the API evolves

Developer, IT Applications   May 2019 - December 2020

- Drove API Design meetings with both technical and business persons
- Built Splunk dashboards to analyze API performance and aid with troubleshooting
- Created and owned Servicing OAS Documentation with a YAML structure
